

## LUXURY STONE

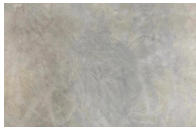

Luxury stone refers to a new service model launched with innovative design concepts, unique design perspectives, and new service models as people's requirements for the quality of life are increasing day by day. The concept of luxury stone was first proposed by Dongxing Group in 2008. It is different from jade carvings, jewellery, architectural stone, and marble products. It is a creative use of large-scale real precious stones. It contains aristocratic temperament and an understanding of poetic natural living conditions. The return of natural aesthetics.
